### PROFILE

I'm a passionate Full Stack Web Developer with expertise in building scalable and efficient applications. With a strong foundation in React, Express, Node.js, MySQL, and Java, I am skilled at creating both dynamic front-end interfaces and robust back-end systems.

### PROJECTS

#### Employee Database Management system

Using HTML , CSS , JavaScript

The Employee Database Management App is designed to streamline the process of managing employee information within an organization. This app allows administrators to:

- Add New Employees: Enter detailed employee information, including name, position, contact details, and other relevant data, into the database.
- View Employee Details: Easily search and view employee profiles with all the entered details.
- Edit Employee Information: Make updates to employee records, ensuring that any changes (such as role or contact information) are reflected in real-time.
- Delete Resigned Employees: Remove employees from the system when they resign or leave the company, keeping the database up to date.
- Monitor Employee Work: Track and review employee work performance and progress, providing insights into their productivity and contributions.

#### Movie App

Using HTML , CSS , JavaScript and API Integration

This Movie App provides an intuitive and user-friendly platform for moviegoers to explore the latest films currently showing in theaters. The app's main feature allows users to browse a list of Now Showing movies. Upon selecting a movie, users can view a pop-up displaying detailed information, including:

- Available Showtimes: The app shows all the available times for each movie, so users can quickly find the most convenient screening.
- Movie Details: Users can read in-depth information about the movie, such as genre, cast, director, and a brief synopsis.
- Ratings & Reviews: The app provides user ratings and reviews to help users make informed decisions about the movie.

### EXPERIENCE

#### Part-Time Salesman

##### Chennai Silks

Duration: 6 Months

As a part-time salesman at Chennai Silks, I developed strong customer service and sales skills in a fast-paced retail environment. My responsibilities included:

- Customer Interaction: Assisting customers in selecting products based on their preferences, offering product recommendations, and providing a personalized shopping experience.
- Sales and Upselling: Meeting sales targets by promoting key items and special offers, as well as effectively upselling complementary products to customers.
- Inventory Management: Ensuring the sales floor was well-stocked and organized, performing stock checks, and assisting with restocking items as needed.
- Cash Handling and Transactions: Processing transactions accurately, handling cash, and operating the POS system efficiently.
- Team Collaboration: Working closely with the sales team to ensure a smooth store operation, offering support in various departments, and contributing to team goals.
